

Your Guide to  
**Natural Gas Appliances**

## Welcome...

...to the Phoenix Natural Gas appliance brochure. This brochure has been designed to help introduce you to the wide selection of natural gas appliances available locally. The range includes an exciting choice of highly efficient real flame fires, a selection of natural gas cookers and ranges that will make your kitchen the heart of your home, and the appliance that takes the pain out of doing the laundry – a natural gas tumble dryer.

We hope that you find the brochure helpful in gaining an insight into many of the leading brands of gas appliances. We encourage you to view the appliances first hand at your local retailers, many of which exhibit the appliances on live display.

# Cookers

With natural gas cooking you get constant heat, speed, efficiency and, above all, controllability. You can see the flame and fine tune the heat and, of course, you need never worry again about cooking time being interrupted by a power cut.

There's a full spectrum of gas cookers available – from the streamlined, stainless steel professional chef's choice to the country kitchen look of a traditional range. With a large variety of styles and prices to choose from, it's easy to find a gas cooking appliance that's right for you.

## Why consider a gas cooker?

Whether you're cooking for friends or family, you should be benefiting from the precision performance of natural gas. Gas hobs offer instant and easy to control heat which spreads evenly across the base of

any pan. In addition, they also offer excellent temperature control and instant on/off settings for cooking or baking.

About **HALF** the running costs of electric\*

Cooking with natural gas is much cheaper than cooking with electricity. In fact, it costs about half as much, but saving money isn't the only benefit...

### THE BLUE FLAME LIGHTS IMMEDIATELY, GIVING YOU INSTANT HEAT AND SUPERB CONTROLLABILITY.

- When you turn the flame off, the pan can stay on the hob without the worry of overcooking because the elements cool quickly.
- No power? No problem. If your electrical power goes out you can still prepare a hot, home-cooked meal using the surface burners.
- Faster cooking time. Because the heat is instant, it takes less time to cook food than with an electric hob, which must warm up before cooking.
- Gas hobs emit less wasted heat than electric cookers which helps maintain a cool environment in your home.

\* (Source: www.which.co.uk)

www.belling.co.uk

Belling is one of the UK's best known and longest established cooking appliance brands - a reputation built on producing innovative, yet affordable, family-friendly appliances with mass market appeal. The range includes freestanding cooking, range cooking and built-in ovens and hobs.

- Separate dual-circuit electric grill
- Tall-fanned electric oven – with a 91 litre capacity
- Multifunction main oven

Natural Gas Cooking

www.iakonline.com/RM

A lot goes into a Rangemaster to ensure a lot comes out. Our 0.9mm gauge cooker doors, for instance, use a single pressed outer door panel to prevent any warping over time. The durable paint finishes are even identical to the ones used to coat Europe's tallest building, the Shard. Building a cooker in any other way, we believe, would be a disaster. But don't just take our word for it. The proof is surely in the pudding, casserole, pie, soufflé...

### Rangemaster 60cm range

For all the benefits of a Rangemaster cooker, but in a smaller package, our new 60cm free-standing cooker collection is the perfect solution.

Available in three models and three colours - the Kitchener, Classic and Professional Plus - there's a model to suit every kitchen style.

Classic Cream

Professional + Stainless Steel

### AGA

An AGA is more than just a cooker. It is a way of life, easy to use, a joy to live with, a great addition to any home, and, of course, it produces great food.

There is no other household appliance that generates this kind of emotion or loyalty. An AGA is a design icon that is as relevant today as it was innovative at the time of its invention. From quick stir-fries through to elaborate soufflés, the AGA excels at every style of cooking. AGA cakes are lighter, roasts are more succulent, chips crunchier, Yorkshire puddings rise more, steaks are juicier and pizzas are always crisp to perfection.

Available in 15 different colours, and various styles (including the new 60cm size). To learn more about this cultural icon, a visit to our showroom is a must.

PART OF THE ECLIPSE RANGE BY GAZCO

# Fires

A living flame natural gas fire offers the warmest of welcomes, providing a cosy focal point in any home.

PART OF THE STUDIO RANGE BY GAZCO

Gas fires have developed significantly in recent years, allowing fantastic style to be combined with the highest of efficiencies. These modern-day appliances suit all budgets, room styles and tastes.

### Why consider a gas fire?

Natural gas fires not only look fantastic, but they're the most instant and hassle-free way to heat up a room. You have the convenience

of having a fire when you want, for as long as you want, just by the single press of a button. Combined with high heat efficiencies and low running costs, today's gas fires offer affordable warmth and visual comfort, whilst also being convenient, safe and easy to operate. Some models even come with thermostats and remote controls. Because natural gas fires turn off just as easily, you never have to leave a fire burning when you leave your home or go to bed.

Unlike a log fire, you can enjoy a **CONSTANT HEAT SUPPLY**

When selecting a gas fire you are choosing ambience, convenience and comfort, plus much more...

**NO MESS, NO FUSS. THERE'S NO POPPING COALS, ASHES OR SPARKS.**

- Maintenance is minimal. Gas fires are never subject to disrupted power supplies.
- There are many stylish gas fireplace designs available that can help add value to your home and make it look beautiful.
- Operation is safe, clean and simple.
- Kinder to the environment. Natural gas burns cleaner than wood and there are no fumes or particles being released into your home.

PART OF THE RIVAS RANGE BY GAZCO

Natural Gas Fires

www.valor.co.uk

Valor fires, established in 1890, is a much loved British brand and one of the most recognised names in home heating. With a commitment to creating energy-efficient heating solutions using the latest technology, Valor offers a range of installation options and design styles to suit every home and lifestyle.

### Blakely Landscape Airflame Convector

Airflame Convector gas fires boast distinctive aesthetics while encompassing the revolutionary Airflame engine burner. Widely recognised as the best burner on the market, it creates an ambient flame effect previously only achieved by real fires. All models also boast high heat efficiency, an exclusive 3 year guarantee and an optional LPG kit.

Combining ultra-contemporary good looks with high heat efficiency, this award-winning model proudly offers a distinctive landscape design with a panoramic driftwood/coal fuel bed. Complete with a brushed chrome and black trim, Blakely Landscape can be either floor or wall-mounted, and remote control comes as standard. Suitable for brick chimneys, Blakely Landscape provides 84% heat efficiency with a 4.3kW heat output.

### Dream Slimline Homeflame

A stunning glass-fronted fire suitable for all chimneys and flues. With an inset depth of just 79mm, it is the slimmest inset, living flame fire available. Impressive heat output, Fireslide control, reflective sides, choice of colours and coal-effect fuel bed.

### Dream Full Depth Homeflame

A more traditional style of fire available in a range of finishes to suit any living space. Impressive heat output and coal-effect fuel bed create the look and feel of a real fire. This fire provides 85% heat efficiency and is easy to operate with its Fireslide control positioned at the top of the fire.

### Petrus Full Depth Homeflame

Contemporary, hand-polished cast fascia available in silver chrome or black chrome finishes with matt black louvres. Impressive heat output with a glass-fronted, deep coal-effect fuel bed that provides a great flame effect with a warm glow and 85% heat efficiency.

Natural Gas Fires

www.nobledi.com

This modern style range of gas fires boasts a range of seventeen 'Infinitely Stunning and Infinitely Designed' models that includes a range of fires suitable for chimney and flue fitting and also some with rear venting balanced flues. These fires have a distinctive, clean cut, contemporary look, yet their high efficiency low running costs make these beautiful fires affordable.

### Infinity 480FL

Pictured here in the Stokesay Limestone Suite is the 480FL infinity gas fire. With stunning realistic wood-fuel bed, this glass fronted, high-efficiency fire is fully remote control. This can also be purchased as a 'hole in the wall' and there are 3 fabulous back liner choices of brick, beige or black mirror glass. 'No flue, no problem' - this can also be purchased as a balanced flue option 480BF.

### Infinity 890CF

This large Panoramic 'hole in the wall' fire takes centre stage in any room. With a stunning, realistic log effect, this fire is available in various trim options - brushed stainless steel, graphite, piano black and chrome and also options of backliners as the 480FL.

### Infinity 780FL

Pictured here as a 'hole in the wall' contemporary fire, this impressive fire is similar to the 890CF but the 'taller' shape gives it another different look. It has the same backliner options but can also be purchased as a complete Limestone Suite. A perfect choice to furnish your living room.

### Infinity 880 BF

This image demonstrates the balance flue option of the 880 series. With no additional ventilation required in the room, this image is pictured with stone brick tiles. The 880BF fire is suitable for fitting with a wide range of stone or marble fireplaces and will create a beautiful high-efficiency, realistic log-burning flame effect with a choice of backliners available.

### Infinity 880FL

Pictured here is the 880FL in the Rembrandt Suite with baske. It has a regal look and adds a touch of elegance to the 880FL high efficiency fire. Available in the various suite options and backliner options, it gives you the freedom to choose your own unique design finish.

www.nobledi.com

The Paragon range of gas fires is a well-established range of both traditional and modern styles. Featuring both open-fronted fires and high-efficiency, glass-fronted fires, they also have choices suitable for chimneys or for those with no chimney. Whatever the requirement, Paragon fires have a gas fire to transform any room into a warm cosy living area.

### Convector P1 High Efficiency - Open flame gas fire

This traditional-look fire - seen here with Elite satin trim in a Wave Suite - is an open flame gas fire with realistic coal fuel bed. It comes with both radiant and convection heat and an efficiency of 70.4%.

### Focus HE -Glass fronted

With a panoramic glass front, pictured here with brass trim cast fascia in Aylesbury Portuguese limestone, this fire boasts an efficiency of 82%. There is a choice of pebble or coal fuel beds and various fascia and fret options to suit every taste.

### P4 Series

The versatile P4 Series is pictured here in The Beckford Limestone surround. It has a large 20" glass front with great flame picture and realistic log-flame effect, and also a remote control. The P4 can be bought complete in a choice of 4 modern Limestone Suites.

### P4 Series

The P4 can be fitted in 3 alternative ways to suit all tastes. Seen here as 'frameless hole in the wall', it gives a modern, contemporary feel in the limestone Suite option, which comes with an option of graphite or brushed stainless steel frames. With an efficiency of 82% this is a perfect choice for both style and efficiency.

### P6 Series

The P6 is a modern 3 sided wall hanging fire that can fit all flue types. It gives a beautiful flame picture wherever you are sitting in your room. It comes complete with graphite metal fascia and an elegant manual control lever to the front of the fire.

### P8 Series

The P8 pictured here as a contemporary 'hole in the wall' flush fitting. It is also available in a limestone surround suite or framed in a stunning glass trim in either black, white or contemporary red. The fire has a large glass panoramic area of 31" yet remains a cost-effective fire with 81% efficiency.

# Tumble Dryers

If there is one thing we can depend on with our climate, it's that we can never be entirely sure of a 'good drying day'.

With running costs less than half that of an electric tumble dryer and with less need for ironing with a gas tumble dryer – it's time to switch to natural gas and make every day a good drying day.

## Why consider a gas tumble dryer?

A natural gas tumble dryer will save you time, add convenience and protect your clothing when it comes to doing the washing, compared to an electric alternative. Most importantly, they are significantly cheaper to run because they're so much more energy efficient.

A gas-vented tumble dryer will have an **ENERGY RATING** of A to A+++

Not only do they reduce carbon emissions and allow you to save money, a natural gas dryer is also kinder to your fabrics

**NATURAL GAS TUMBLE DRYERS ARE RELIABLE AND OVER TIME, THEY WILL MORE THAN PAY FOR THEMSELVES IN FUEL SAVINGS AND PROVIDE A TROUBLE FREE PERFORMANCE.**

- It will fluff and freshen your washing.
- Dries fabrics more quickly and more efficiently.
- Offers touch controls, digital displays, and microcomputer based temperature settings for sensitive fabrics.
- It senses when your fabrics are dry, which saves energy and reduces the risk of shrinkage.
- They automatically shut off when the load is dry and the heat will disappear quickly, which reduces the amount of wrinkling.

## Natural Gas Tumble Dryers

**UC Living**

www.ucliving.co.uk

Introducing the Natural Gas Tumble Dryer from UC Living. An alternative way to tumble dry your clothes, but now at an affordable price. With an astonishing 60% savings\* compared to the costs of an electric dryer, this highly efficient, economical dryer is the choice for today.

## UC Living Natural Gas Tumble Dryer

The UC Living Tumble Dryer comes in 2 different models - the Eco 43A and the Eco Logic 86A. Both dryers have a large 7kg capacity, are available in a choice of 3 modern colours - White, Black or Silver - and have an energy rating of A+. The reverse tumble action helps to keep ironing to a minimum.

## UC Living Eco 43A Gas Tumble Dryer 7kg

- Energy efficient, reverse action tumble dryer.
- Fits under standard work top
- 2 heating settings
- Door hinged left/right
- 140-minute timer
- Final cool down tumble
- Available with stacking kit and shoe rack option
- Easy access fluff filter
- Energy Rating A+
- Available in 3 modern colours.

## UC Living Eco Logic 86A Gas Tumble Dryer 7kg

- Sensing electronic dryer
- 12 pre-set levels of dryness
- 3 heat settings
- Highly efficient reverse tumble dry
- Digital LED display
- Anti-crease option at end of each cycle
- Delay start feature - up to 9 hours in 1 hour increments
- Timed 30 minute 'freshen up' programme
- Door hinged left/right
- Fits under a standard work top
- Energy Rating A+
- Available in 3 modern colours.

Natural Gas Heating

**fondital**  
BE INNOVATIVE

www.iakononline.com/fondital

What better way to benefit from aluminium radiators in your home, than when you are having a new central heating boiler installed.

### Upgrading to Fondital aluminium radiators is an excellent way to save money

Given the choice of heights, widths, styles, energy-saving credentials and sustainability from this top European manufacturer, it's no surprise that Fondital aluminium radiators are fast becoming the new fashion statement and furnishing accessory in our homes today.

Aluminium is a lightweight material and has a much lower thermal inertia than steel, which means it heats up faster than your current steel radiators and, because Fondital aluminium radiators contain very low quantities of water, your boiler has less work to do to get your radiators up to working temperature. Furthermore, by adding thermostatic controls to your radiators you can be sure that when your rooms are warm enough, the hot water supply from your boiler to your radiators can be reduced or even stopped, helping cut fuel costs further.

Your central heating specialist will undoubtedly suggest a high energy-efficient condensing central heating boiler, and Fondital aluminium radiators are especially suitable for use in central heating systems that use low flow temperatures from these modern boilers. Supplied in a beautiful powder-coated white finish as standard that is 100% fade resistant, and a 10 year guarantee with the option to extend this to 20 years, you can be sure that your decision to change to aluminium is a wise one.

Cut your heating bills with Fondital

# Natural Gas Appliances

TELEPHONE:

**03454 55 55 55\***

\*Calls to 0345 numbers are charged at the same rate as calls to standard landline numbers starting with 01 and 02. The cost will be the same if you are calling from a landline or mobile. If you have "free" minutes as part of your mobile phone tariff, then calls to 0345 numbers should come out of that and there should be no additional charges on your bill.
