

How to use your Libra 210 gas meter

Libra 210 Meter Functions

This meter is operated by a Quantum Card. To function properly this card must be registered with the meter. Cards can only be obtained from your gas supplier.

Registering Your Card

- 1 Insert the Quantum card fully into the card slot with the gold chip facing up.
- 2 Wait for at least one minute until the meter beeps to confirm registration.
- 3 Now that the card is registered it can be used at any PayPoint to top up.

Transferring Credit To Meter

- 1 Insert the Quantum card fully with the gold chip facing up.
- 2 Press and hold the **red button A**.
- 3 The meter display will confirm the amount of credit on the card and update the credit total.

Restoring Gas Supply and Emergency Credit

If credit runs out or runs too low, the meter will notify you by closing the gas valve and stopping supply. If this happens the meter will display '**OFF**' & '**EmCr** (emergency credit) **available**'.

- 1 **Before attempting to restore the gas supply, you must switch off all appliances.**
- 2 Insert the Quantum card fully with the gold chip facing up.
- 3 Press and hold the **red button A** until '**release A for gas**' appears on screen.
- 4 Emergency credit has now been provided and the valve is now '**ON**'.
- 5 The gas valve is now open and all appliances are safe to use.
